TONE OF VOICE

BRAND VALUES

EDGY
INDEPENDENT
SOCIABLE

TONAL PRINCIPLE

HUMOUR
SIMPLE & SNAPPY
CONVERSATIONAL

NOT TOO FORMAL. NOT TOO SILLY.
Media One is that modern and independent person who knows what they're worth and exactly what they want (just like our customers). We keep things to the point. Never take ourselves too seriously. But never ever tell punny jokes either. Our target is young, urban and outgoing, which is why our tone of voice must have an easy and conversational vibe. Trying to sound 'cool' often falls flat – **so don't. Keep sentences short. Speak like a grown-up who knows how to have fun. And stay away from unnecessarily complicated vocabulary ('showy' and 'ostentatious' mean the same thing).**

YAYs

- Be conversational.
- Pull humour from current events when relevant.
- Keep things short and snappy.
- Use simple vocabulary.

NAYs

- Avoid overused phrases, such as "Keep calm and ...".
- Do not bury key information in long sentences.
- Try not to oversell or over-hype offerings – play it cool.
- Watch your tone.
- When speaking to business travellers, be slightly more professional and understand their priorities. Our tone must make them feel welcome to enjoy a stress-free stay in an efficient environment. Whether they need a print-out at 5am or a pint after their meeting, we're here to help.
- As for leisure travellers, feel free to play up our fun side. The city is now their playground, but don't let them miss everything that awaits right in the hotel. Our tone should feel spontaneous, casual and welcome them with ease.

As for Arabic

Never simply translate English copy. It is important to understand the essence of the message and create equally compelling copy in Arabic. If a certain phrase does not exist in Arabic, think of one that may be similar, or just communicate the message following the tone of voice.

BRAND NAME

Media One is more than just a hotel, it is a destination. Use “Media One” in all communication except for guest communication like reservations and online hotel platforms. For example, when sending a reservation confirmation to a guest, make sure to use “Media One Hotel”. For all event promotions and local communications use “Media One”. In both cases always use our name in Title Case. This rule doesn’t apply to url’s when used on collaterals. For the latter, make sure the name is typed in UPPERCASE.

Below are some examples.

Media One is that modern and independent...

... arriving at Media One Hotel...

MASTER LOGOS

Our English and Arabic logos must always appear in the proportions and colours shown in this guide, and no attempt should be made to redraw, stretch, squeeze or distort the brand-mark in any way. Our logo colours are the charcoal grey and deep pink. Brand colours are further broken down on page 28.

SINGLE COLOUR LOGOS

Media One's logos should work across all media. Below are the single colour logos using our charcoal grey. Brand colours are further broken down on page 28.

REVERSE LOGO

Our logo can also be used in white (reverse) on any colour or background as long as it is clearly visible.

ENGLISH LOGO CLEAR SPACE

Our English logo should always be surrounded by a minimum area of space. This area of isolation ensures that headlines, text or other visual elements do not encroach on the logo.

The area is defined by using the height of the letter “M” in the logo, which is referred to as “X” in the diagram.

A margin of clear space equivalent to “X” is drawn around the logo to create the invisible boundary of the area of isolation.

This area of separation is the minimum required and we recommend increasing it wherever possible.

LOGO MINIMUM SIZE

Our logo has been designed to be reproduced at a minimum width of 20 mm.

The minimum size of the logo in online applications is 65 pixels width.

There is no maximum reproduction size of the logo.

25 mm width

25 mm width

95 pixels width

95 pixels width

INCORRECT LOGO USAGE

It is important that the appearance of our brand remains consistent.

The logo should not be misinterpreted, modified or added to. The logo must never be redrawn, adjusted or modified in any way. It should only be reproduced from the artwork provided. This applies to both our English and Arabic logos.

To illustrate this point, some of the more likely mistakes are shown on the below.

Do not add any kind of effects like a drop shadow to the logo.

Do not stretch, condense or change the dimensions of the logo.

Do not use gradient colour.

Do not change the colour of the logo.

Do not apply stroke to the logo.

Do not outline the logo.

Do not change proportions of the logo.

Do not use on background that creates low contrast.

Do not rotate the logo.

BRAND COLOURS

Beyond our logo, colour is the most recognizable aspect of our brand identity. Using colour appropriately is one of the easiest ways to make sure our materials reflect a cohesive Media One image or visual story.

The primary colours are broken into two colours that should always dominate layouts. Our logo can only be represented using these two colours.

The accent colours are broken into two colours. Use these colours in combination with our primary colours sparingly.

When using colour builds, always use the colour values listed here. They were adjusted for the best reproduction in print and on screen and do not match Pantone® Colour Bridge breakdowns.

TYPOGRAPHY USAGE

LET YOUR THOUGHTS RUN FREE.

THIS IS YOUR SECRET CANVAS.

BODY TEXT:

Geomanist is our body text font. It can be used to highlight sections in body copy using its medium weight. For the rest of the text you can use a mix of light and book to highlight important information.

The preferred font size for body text is 11 pt with 12 pt leading and 15 tracking. Always use our charcoal grey for the body text colour. Body text is always better justified.

HEADLINES:

Chartwell Bars is our headlines font. There is only one weight available for the usage.

The leading of the headline should always be 4/5 of the font size. The tracking should always be set to 600.

For example, if the font size is 100, the leading will be 80.

SUB-HEADLINES:

Chartwell Bars is also used for sub-headlines.

The sub-headline's font size is 2/3 the headline's point size. The tracking is always set to 180. The 4/5 rule for the leading applies to the sub-headlines as well.

Any brand colour apart from the charcoal grey can be used for the headlines and sub-headlines in alternation.

Both headlines and sub-headlines are better centre aligned.

SYSTEM TYPEFACE

When it is not possible to use our brand primary and secondary fonts, use Verdana for English and Microsoft Sans Serif for Arabic in emails, word documents, and powerpoint presentations. Verdana and Microsoft Sans Serif are both cross-platform fonts available worldwide.

MEDIA GRAPHIC DEVICE

The media graphic device should be used to give structure to layouts, add dimension and create design hierarchy. It always holds texture or imagery and can never be used to hold just colour. The circle part can be used to focus on important parts of the imagery and textures. More details on how to use the media graphic device on page 32.

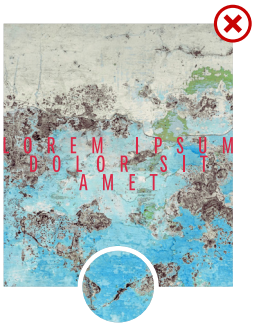

Do not use plain colour.

Do not place text or headlines in the square part of the device.

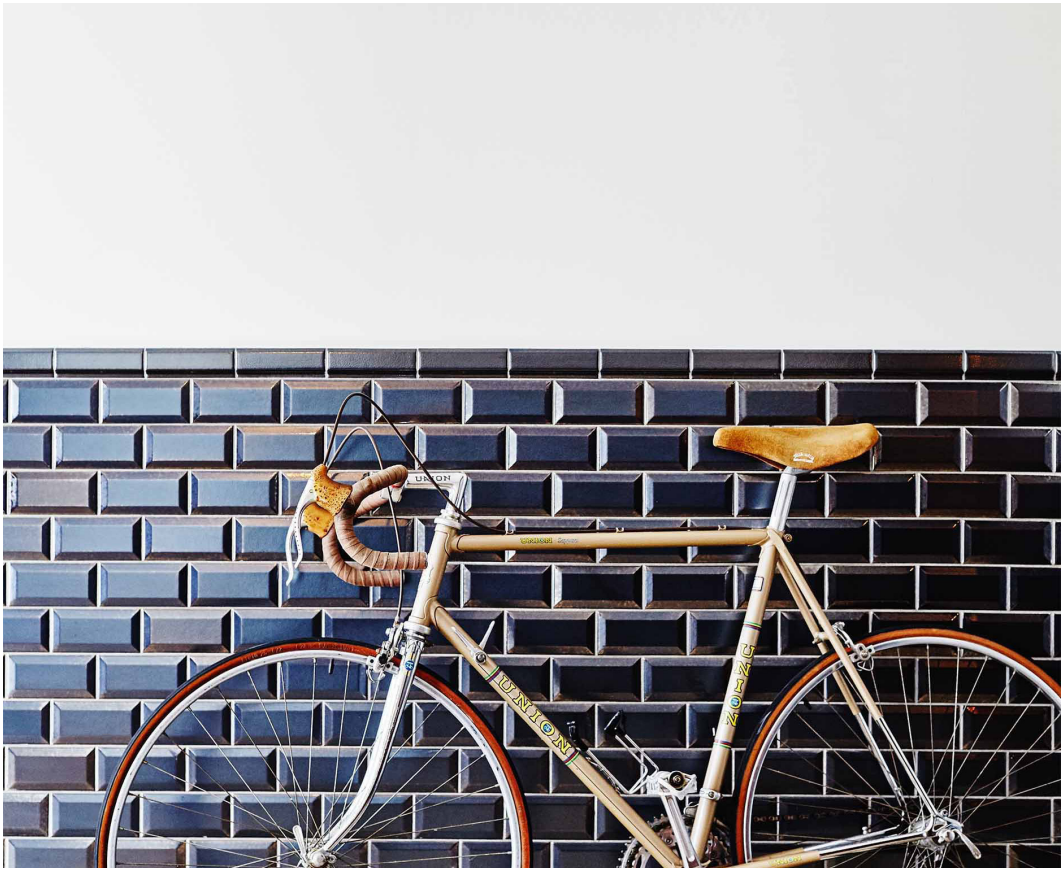

Do not use image collage in the device.

INTRODUCTION

A successful brand has a clear and concise brand identity. Photography is a critical component in how Media One is represented in advertising, collateral and online.

Nowadays guests judge a hotel based on the photographs they view online. Well shot photography will set the scene and create ambience for a guest before they even arrive.

It is crucial that the photography stays consistent and follow the standards and guidelines set in this document.

LIFESTYLE
PEOPLE

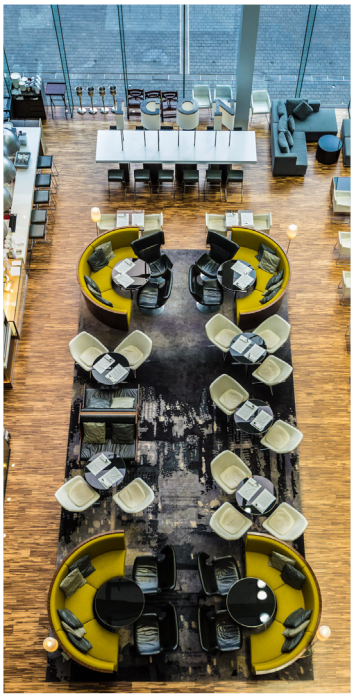

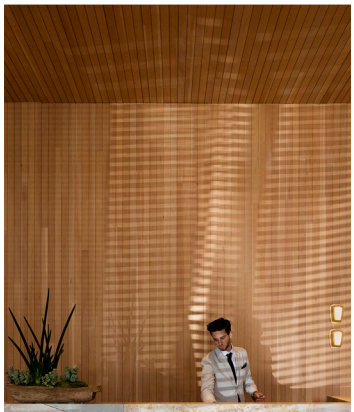

- Images must seem as if we captured a personal and intimate moment in time.
- Models must be young, modern and trendy.
- Actions and expressions cannot look forced. Smiles, laughter, body language and actions must all appear natural and spontaneous.
- Team members can only be portrayed as team members, not as a guest/model. All models must be professional, chosen by the photo team and approved by the hotel.
- Styling is to be urban contemporary, trendy fashion patterns, colours and haircuts.
- Shots cannot be busy and should follow the rule of third.
- Lifestyle photography should have a blue filter and a subtle texture overly.

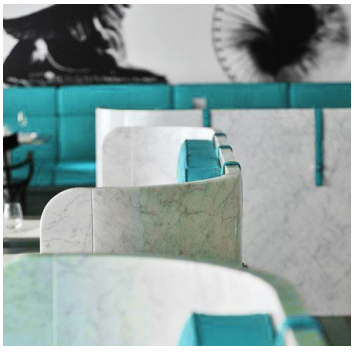

INTERIOR
LOBBY & COMMUNAL AREAS

- Make sure the lobby is tidy and there are no distractions such as luggage or barrier ropes.
- All lights should be on and working properly. Pillows and cushions should be wrinkle-free and all tables/windows/floors must be cleaned.
- No magazines or newspapers on display and televisions must be off or with our logo.
- In addition to images that showcase the entire lobby and communal spaces, make sure to focus on different areas and aspects, such as unique lighting fixtures, interesting furniture, angles and spaces.
- Layer various exposures into the final image so all areas have the very best lighting and the image has contrast and style.
- Make sure to showcase the natural lights, colours and textures present in the hotel.
- Make sure to keep the treatment natural with no filters and effects.

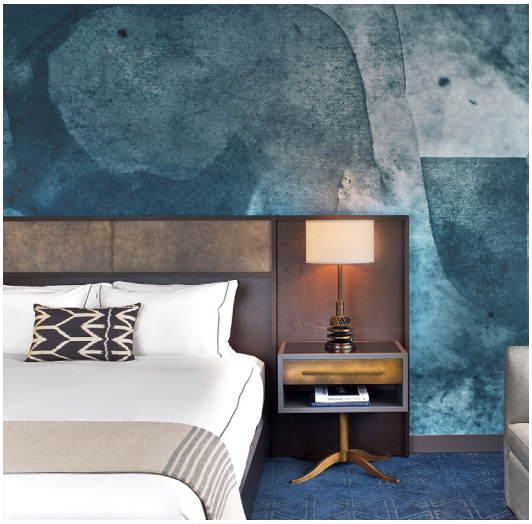

INTERIOR
ROOMS & SUITES

- The most important consideration when photographing guest rooms is to create an inviting feeling and to highlight a main element of the room – bed, view, amenities, etc.
- Bedding and bed skirts must be cleaned, pressed and pin-tucked in the corners. Even the smallest wrinkles will show. The bed should always appear lush and soft; sheet/ blankets must never hang loosely off the side and duvet covers must never look empty in the corner pockets.
- Any branding on mugs and labels on water bottles must be removed from view.
- Mood lighting is acceptable, but not too dark where items are unrecognisable.
- Photograph the rooms with the best views. All curtains and sheers must be fully open. If the view is not available, try not to show the window or close the sheers, but make sure to allow natural sun light.
- Allow a natural treatment with no filters and effects, showcasing the natural lights, colours and textures present in the room.

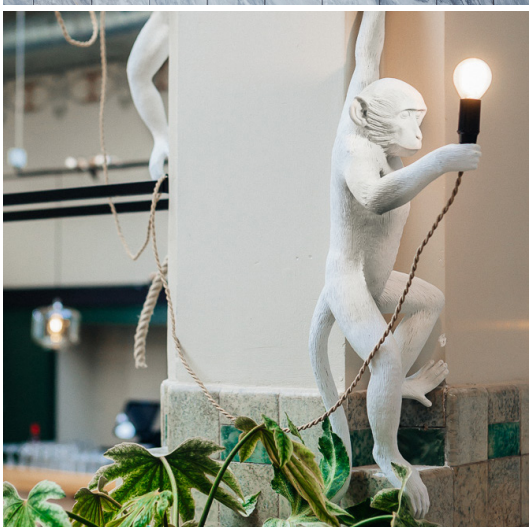

INTERIOR
DETAIL

- Detail shots can be highly artistic and abstract, make sure the photographer has enough time to explore and roam the hotel grounds, both interior and exterior to capture the details, shapes and architectural elements in and around your hotel. Allow the photographer the opportunity to be creative. Many times unplanned shots are liked the most!
- Shots cannot be busy and should follow the rule of third.
- Seek out the unique features and photograph them at various angles.
- Play with long shadows and various textures found within the hotel.
- Good natural light is preferred to make sure good exposure and contrast.

INCORRECT PHOTOGRAPHY USAGE

Below are only few examples of what to avoid when it comes to imagery usage and photography:

- Make sure not to use panoramic, fish-eye or any non-standard lenses in the hotel interior photography.
- Overused metaphor and cliché stock images should not be used.
- Out of focus images.
- Images with high contrast and exposure.
- Dark and extremely colourful images.
- Close-up portraits.
